## Skills

---

**Languages:** JavaScript, HTML, CSS, Python, C++

**Library:** React

**Tool:** Git

**Soft Skills:** Time Management, Teamwork, Communication, Problem Solving, Leadership, Accountability

## Projects

---

### Openboard Clone ☑

- Built with HTML, CSS, JavaScript, Express.js and Socket.io.
- Developed basic open board with functionalities such as writing, erasing, downloading the canvas, adding notes with minimizing, closing, dragging it around the page.
- Uploading the image (features same as of notes), undo and redo actions.
- Added real time drawing functionality using Socket.io by connecting to server using Express.js.
- Created Undo-redo features for the board using Array as Stack by storing positions, colors and width of the pen and eraser.

### Sorting Visualizer ☑

- Built with HTML, CSS and JavaScript.
- A Web-APP where sorting algorithms are implemented.
- Algorithms like Heap sort, Quick sort, Bubble sort, Insertion sort, Selection sort and Merge sort are demonstrated which sort the randomly generated array.

### Camera App ☑

- Built with HTML, CSS and JavaScript.
- A Web-APP which provides multimedia functionalities.
- Users can record video and capture images in real time.
- Pictures and videos can be downloaded from the App to gallery and can delete it also from the App.
- Real time filters can be applied.
